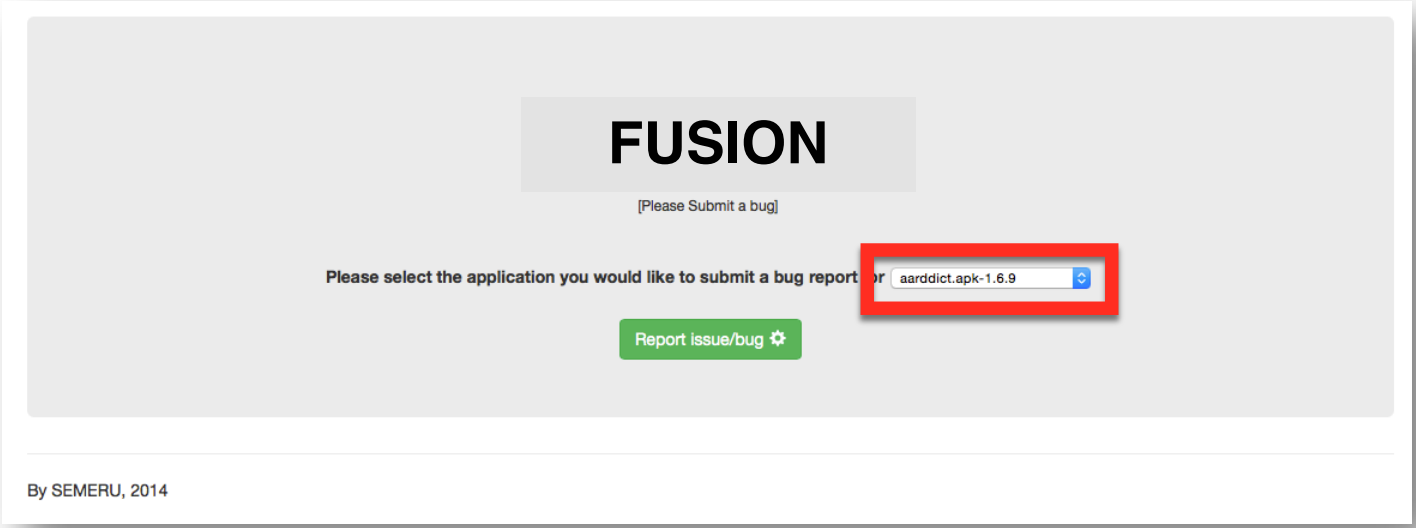
# Using our Prototype FUSION Bug Reporting System

Instructions By: Kevin Moran

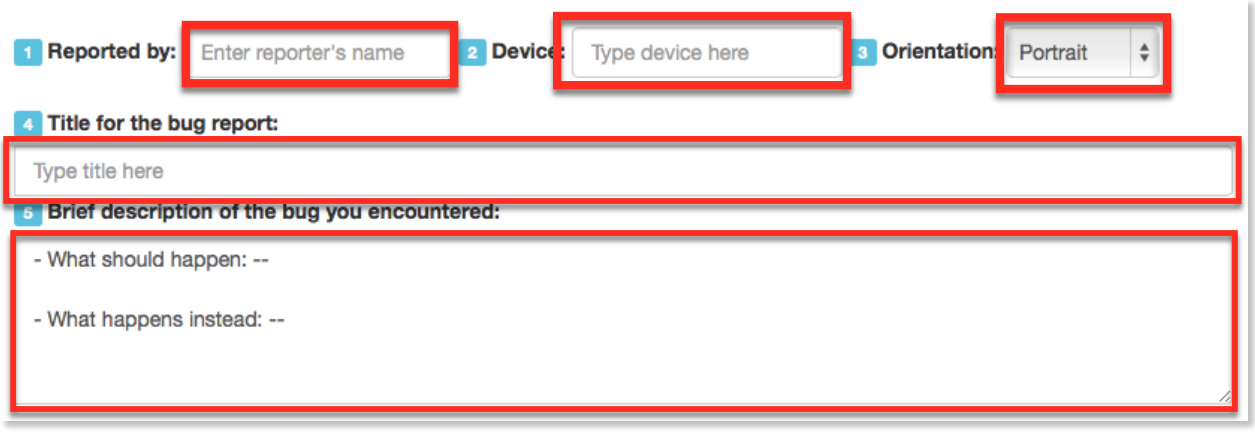
College of William & Mary

## Creating a Bug Report with FUSION

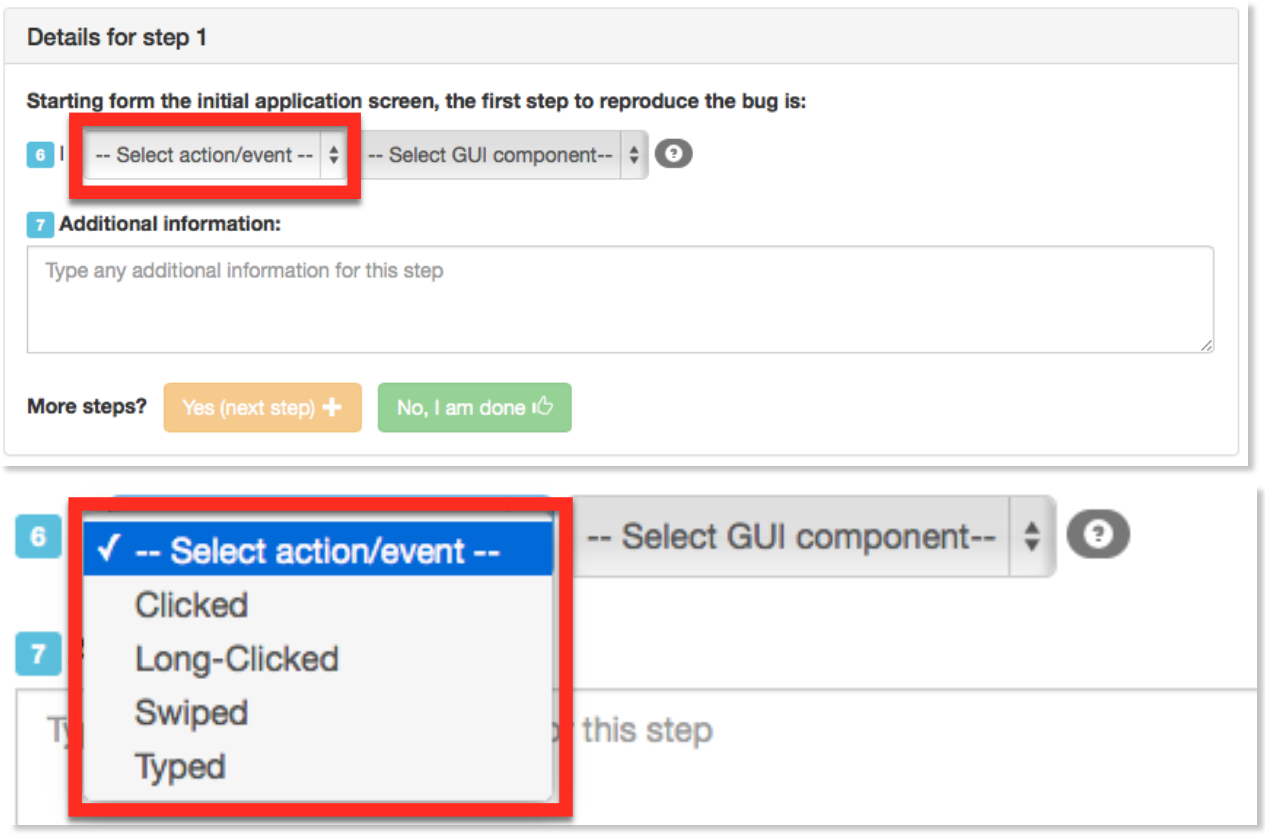
-First Select your project from the dropdown menu on the welcome page. The main FUSION reporting page can be accessed at: http://23.92.18.210:8080/FusionWeb/



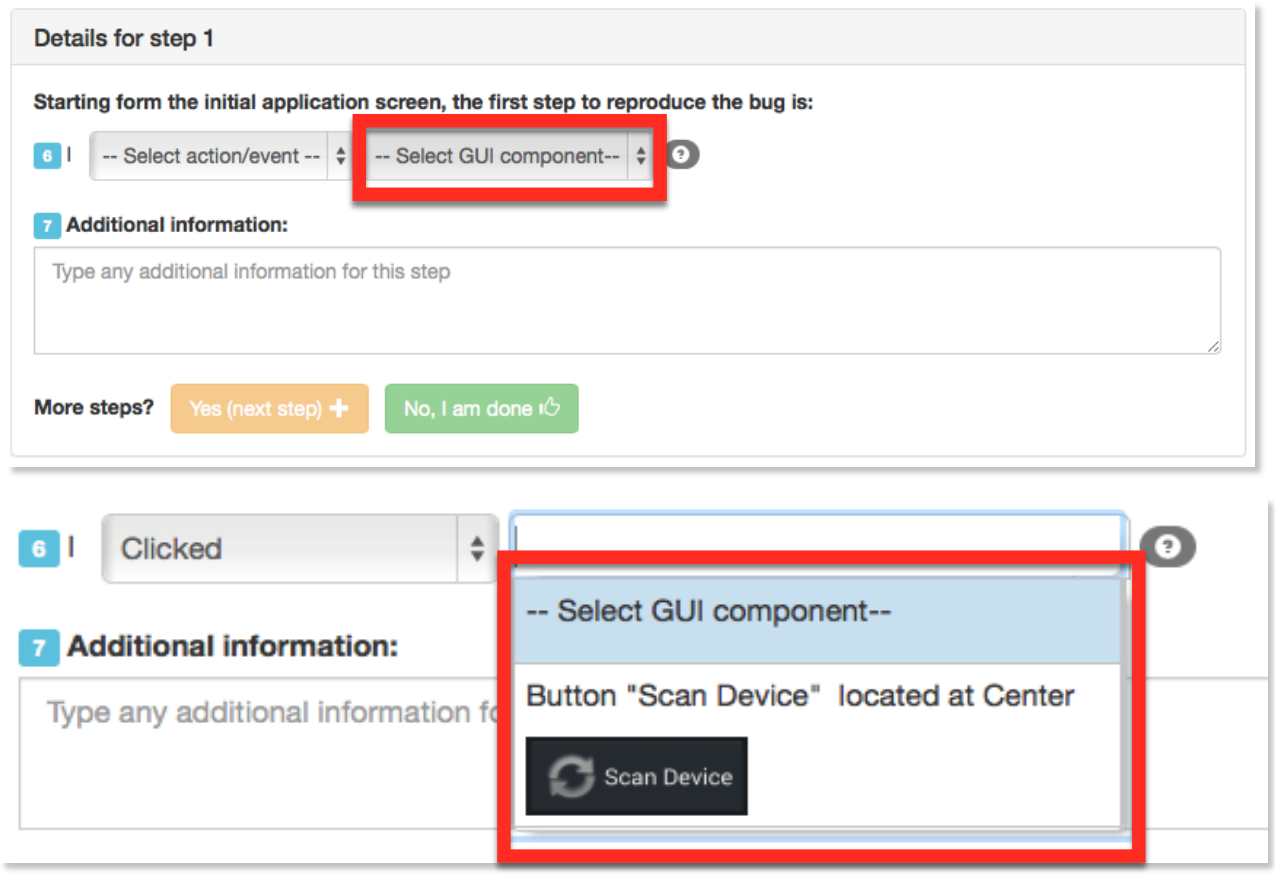
- After filling in this top content box, please fill out the ***steps A-D*** to reproduce the bug starting from the initial application screen, as seen in the steps below:



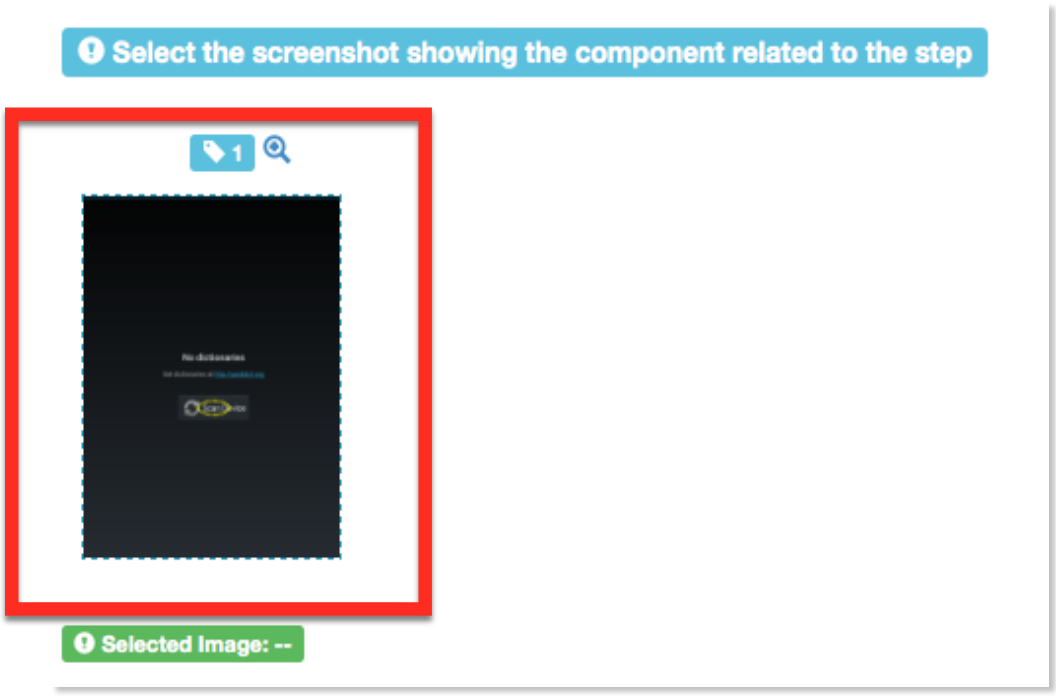
**Step A:** Select the action you performed (Click, Long-click, etc.)



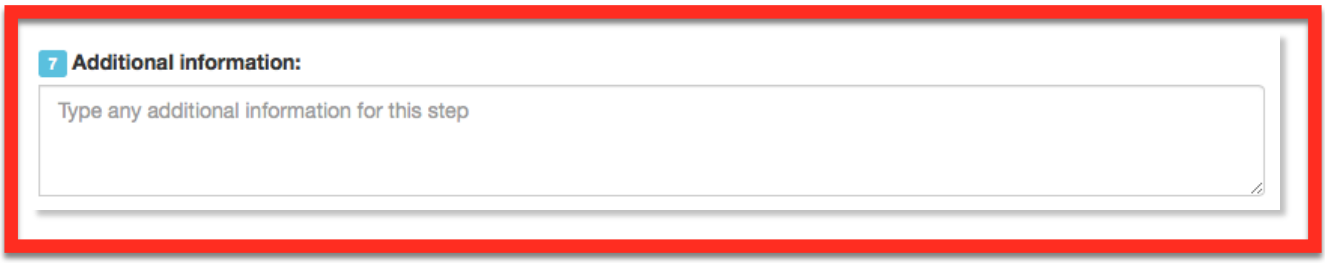
**Step B:** Select the GUI component you performed the action upon.



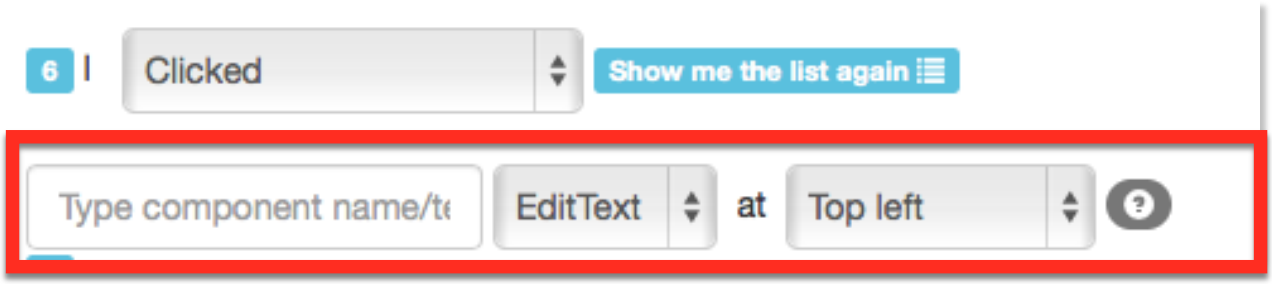
**Step C:** Select the Screenshot that corresponds to the component you acted upon.



**Step D:** Type any additional information about the step that you deem important, this step is not required.



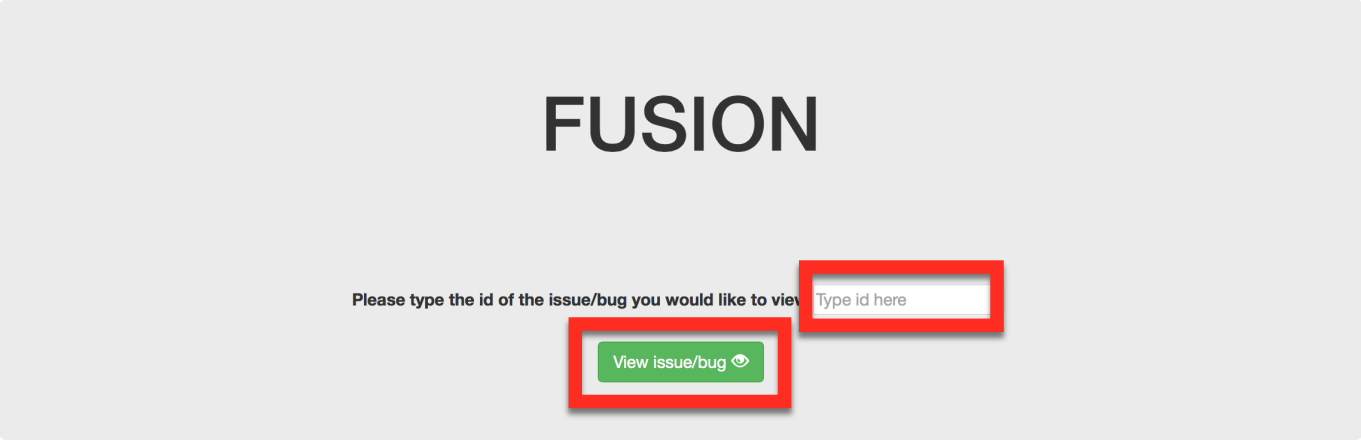
***Step E:*** Repeat the above steps until you have reported all steps that will reproduce the bug. Sometimes, during the course of filling out the report, there will be instances where you may not see the GUI-component that you interacted with. In these cases please select the "Not in this list…" option, and fill out the remaining information as best you can.



# Viewing a Bug Report Created with FUSION

A) First navigate to the FUSION Web-based Report Viewer at the following URL: http://23.92.18.210:8080/FusionWeb/viewer.jsp

B) Once on the Report Viewer Page simply enter the ID of the Bug Report you wish to view in the text box as shown below and click the “View Issue/Bug Button” as shown below:



C) If a bug report with the corresponding ID you entered exists, you will be brought to the Report page which will look like the following:
